### Jobs at SolAero Technologies

#### Sr. Program Manager

#### Albuquerque, NM

The PM defines program tasks, schedules and associated budgets (ETC, EAC) in partnership with internal stakeholders, including, but not limited to, Operations, Planning, Finance and Engineering Functional Areas. The PM interfaces with Functional Area Managers to assure adequate human and other resources are allocated to meet program cost, technical and schedule requirements. The PM will proactively manage and communicate project risks and issues, develop solutions to mitigate/contain the risk and manage constraints/conflicts. They will track program metrics, report program status and perform data analyses, as needed, in support of PMO initiatives.

#### Manager, Supply Chain

#### Albuquerque, NM

The Inventory Manager will be responsible for activities related to the receiving, storing, and/or shipping of materials or finished goods. Ensures materials are properly received and transacted, delivered to inventory and that finished goods are packaged according to specification and shipped in a timely manner. Ensures the security, accountability and accuracy of inventory by developing and executing an inventory control plan.

#### Sr. Database Administrator

#### Albuquerque, NM

Seeking a highly motivated and well-rounded Senior Database Administrator (DBA) with a strong development background to be part of a fast-paced production support and full-lifecycle implementation team. Candidate is expected to be familiar with database architecture, logical and physical design, automation, documentation, installs, shell scripting, T-SQL programming, backup & recovery concepts, and database performance and tuning in a Microsoft environment. Candidate must have good analytical, verbal and written skills.

#### Supervisor, Production

#### Albuquerque, NM

Directs the development and implementation of activities in production area(s) to meet production goals, quality and cost objectives. Prioritizes production schedules based on product introduction, equipment efficiency and materials supply. Makes budgetary recommendations for direct/indirect labor. Develops schedules and manpower requirements for assigned areas. Selects, develops and evaluates personnel to ensure the efficient operation of the function. Receives assignments in the form of objectives with goals and the process by which to meet goals.
