ABOUT THE CDC FOUNDATION

TOGETHER OUR IMPACT IS GREATER

The CDC Foundation is an independent nonprofit and the sole entity created by Congress to mobilize philanthropic and private-sector resources to support the Centers for Disease Control and Prevention's critical health protection work.

The government has unique capacities as well as limitations. The same is true for the private and philanthropic sectors. We believe that people, groups and organizations have greater positive impact and can accomplish more collectively than individually. By aligning diverse interests and resources and leveraging all parties' strengths, our focused collaborations with private and philanthropic partners help create greater impact than any one entity can alone. Your support saves and improves lives—right now and in the future.

Thanks to our donors, we have launched approximately more than 1,000 health protection programs and raised nearly \$900 million to support CDC's work over the past two decades. To keep people healthy, safe and secure, we managed hundreds of CDC-led programs in the United States and in more than 140 countries.
